Summary

Computer Science and Systems Analysis and Development student with a Technical Diploma in Systems Development from SENAI and a professional focus on Python backend development. Hands-on project experience with FastAPI, REST APIs, PostgreSQL, SQLAlchemy, JWT authentication, Pytest, Docker, and Git, plus practical exposure to React, TypeScript, and Supabase. Seeking a software development or backend internship to apply and deepen this technical foundation within a team.

Education

Universidade Anhembi Morumbi

Bachelor of Science in Computer Science

Feb. 2026 – Dec. 2029

São Paulo, Brazil

SENAI São Paulo

Technology Degree in Systems Analysis and Development

Jan. 2026 – Dec. 2027

São Paulo, Brazil

SENAI São Paulo

Technical Diploma in Systems Development

Feb. 2024 – Dec. 2025

São Paulo, Brazil

Core Competencies

- Python Backend
- REST APIs
- SQL and Relational Databases
- Data Modeling
- Object-Oriented Programming
- Automated Testing
- Git and GitHub
- Software Engineering

Projects

Vyzor | *Python 3.11, FastAPI, PostgreSQL, SQLAlchemy 2.0, Alembic, JWT, Redis, Docker, Pytest* **2025 – 2026**

- Developed and structured the REST backend of a data management and automation platform using Python and FastAPI.
- Modeled persistence with PostgreSQL and SQLAlchemy 2.0 and organized database migrations with Alembic.
- Implemented JWT authentication, role-based authorization, and Redis caching across application flows.
- Developed Pytest tests, Docker containerization, and services for reports, scheduled tasks, and data connectors.

ScopeMaster | *React 18, TypeScript, Vite, Supabase/PostgreSQL, RLS, Tailwind CSS*

2026

- Led the technical development of an academic platform for collaborative software requirements management, validation, and tracking.
- Built React 18 and TypeScript interfaces and integrated PostgreSQL persistence and SQL access rules through Supabase.
- Implemented dashboards, notifications, voting workflows, and requirement validation flows.
- Generated PDF reports and used Git and agile practices throughout the academic delivery.

Multilingual Web Portfolio | *React 17, JavaScript, Framer Motion, Lenis, Vercel*

2026

- Developed a responsive personal showcase with theme support, animations, and content available in six languages.
- Deployed the application on Vercel and integrated resume, project, certificate, and professional contact content.

Technical Skills

Languages: Python 3, SQL, TypeScript, JavaScript

Backend & Testing: FastAPI, REST APIs, SQLAlchemy 2.0, Pydantic, JWT authentication, Pytest

Databases & Caching: PostgreSQL, SQLite, Supabase, Redis

Supporting Frontend: React, Tailwind CSS, HTML5/CSS3

Tools & Infrastructure: Docker, Docker Compose, Alembic, Git, GitHub Actions, Linux, VS Code

Concepts: Object-oriented programming, data modeling, debugging, SOLID principles, Scrum

Spoken Languages: Portuguese (Native), English (B1 – Intermediate)
